

PROJECT: Implement Client Script & UI Policy – Incident

4. Project Planning Phase

Activities

Identify the required Incident fields, create UI Policies, create Client Scripts, prepare test cases, perform testing, fix errors, document the project, and prepare the final demonstration.

Resources

ServiceNow instance, Incident form, browser, test records, documentation, and test user account.

Testing Plan

Test matching and non-matching conditions, empty and invalid values, form loading, field changes, and form submission.

Risk Management

Avoid conflicting UI Policies and Client Scripts, use clear names, test in a safe environment, and document all configurations.

Deliverable

A project schedule, resource plan, testing plan, and risk plan.
